PharmaSafety™ Waste Containers

Developed exclusively to meet state regulations for pharmaceutical waste. White with blue lids, they are easily distinguished from other disposal containers. Each has a leak-resistant gasket and absorbent pad to help contain liquid contents. Floor carts and locking wall-mounting brackets offer point-of-use placement and enhance security, stability and mobility.

“...Most waste pharmaceuticals must now be managed as medical wastes. Waste pharmaceuticals must be segregated from other types of medical wastes and must be contained in a sturdy container.”

California Health and Human Services Agency
Department of Health Services

PharmaSafety™ Label
Meets DHS requirements for content restrictions, incineration, and 90-day dating.

White and Blue Color
Easily distinguished from Sharps, Chemo and other disposal containers.

Leak-Resistant Gasket and Absorbent Pad
Help contain liquid contents.

Tamper Evident Label
Helps deter tampering during final disposal.

Sturdy, Rigid Polypropylene Construction
Excellent impact and leak resistance (unlike cardboard or fiber) to contain heavy vials, IV bags, liquids and more.

Sizes Suitable for Multiple Locations
Nursing units, med carts, anesthesias, pharmacies, etc.

Secure, Hinged Lid with Temporary and Final Closure
Accepts larger, bulkier waste; closes temporarily between uses; locks for final disposal.

Nestable Containers
Save valuable storage space.

Locking Wall-Mounting Brackets and Floor Carts Available
Allow point-of-use placement and one-handed disposal; increase mobility, stability, and security.

**What is California Senate Bill 1966, Chapter 536 (SB1966)?**

A law regulating the handling, management and disposal of pharmaceutical waste in California. The law is regulated by the California Department of Health Services (DHS) under the Medical Waste Management Act. The MWMA simplifies the management of the pharmaceutical waste stream, and transfers regulatory authority from the Department of Toxic Substances Control to the DHS. It helps eliminate pharmaceuticals from the solid waste and public sewer waste streams.
